NEWS OF THE DAY AT MT. PLEASANT BRIEFLY RELATED

**Patrons' Day to Be Observed
in Schools Friday,
February 18.**

PRESENCE OF PARENTS URGED

Principal, Delong, Confidence (Good Work in Being Done but is anxious that There Be Personal Inspection; Lincoln's Day to Be Observed.

Special to The Courier.

MOUNT PLEASANT, Feb. 11—Patrons' day will be observed in the public schools Friday, February 18. The High School orchestra will render a concert in the high school building in the evening, beginning at 7:30. Prof. H. M. DeLong says he is satisfied that a very good school system is in use and that splendid work is being done and he asks the parents to arrange their work that they may spend Friday in the schools and satisfy themselves of the kind of training the boys and girls are receiving.

Lincoln Day Observance.
Lincoln Day will be observed in the Mt. Pleasant Presbyterian Sunday school on next Sunday morning.

Thanks to Close.

While the banks will close tomorrow on account of Lincoln's birthday the post office will remain open as usual.

WHEN YOU USE IODINE

For Soreness, Lameness, Cuts or Bruises.

Iodine has been used as a general antiseptic, healing agent and first-aid dressing for minor injuries for over one hundred years, and today it is as effective as ever.

In nearly every home, the Iodine bottle has a prominent place. But ordinary Iodine of today is objectionable in that it is very strong and often irritates or blisters the skin.

To overcome these serious disadvantages of the Iodine of today and still retain the per cent. medicinal value, has long been a problem which has finally been successfully solved by a well-known European chemist, who has recently marketed a preparation called Laminated Iodine Compound, which, according to tests, made by physicians, householders, and army surgeons, effectively takes the place of the old-fashioned Iodine.

It goes further and costs less, at the same time offering a desirable Iodine solution that can be evaporated, again, irritate or blister and does not lose its strength.

The next time you want to use Iodine—try Laminated Iodine. Many think if you don't like it better than the Iodine, any good druggist can now supply you.—Advt.

COAL TAX BILL

Will Start a Bitter Fight When Introduced in the Legislature.

HARRISBURG, Pa., Feb. 11.—A bitter fight is expected when the administration bill placing a tax on coal is presented to the Legislature next week.

This, the first revenue bill to come from Governor Spang, will probably be presented Tuesday night.

The bill will provide a two per cent tax on the value of coal per ton as it comes from the mines. Twenty per cent of this revenue will be returned to the counties in which the coal is mined. 20 per cent will go into a reclamation fund to take care of any damages arising from mine cave-ins and other accidents and 80 per cent to the state. The state will collect and distribute the tax.

Confluence

CONNELLSVILLE, Feb. 11—W. H. Metzger, of Connelville, who met with a serious injury several months ago, has so far recovered as to be able to visit friends here yesterday.

J. L. Hyatt, of Drakestown, was here yesterday on his way to Hyndman.

Clarence Butler, of Selbyville, Md., was here yesterday on his way to Ohio.

Charles Bender, clerk at the Baltimore & Ohio station, is off duty on account of a badly sprained ankle. J. L. Burnworth is working in his place.

Harry Campbell, of Humberst, was in town yesterday transacting business.

Mrs. Fannie Moon went to Rockwood yesterday to visit friends.

Earl Hall and Willis Hager, were business visitors to Rockwood yesterday.

Harry Collins, of Erie, was in town yesterday transacting business.

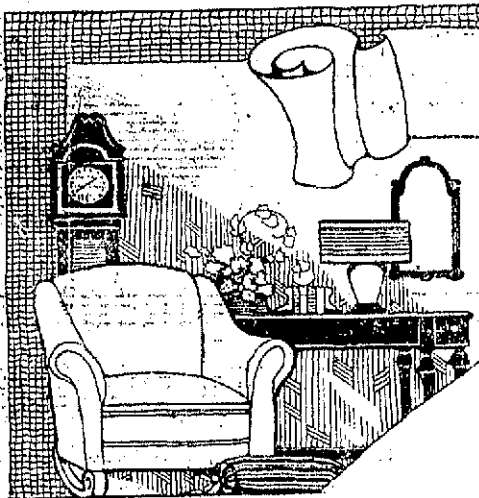

J. H. Johnson, of Meyersdale, was a business visitor here yesterday.

No substitutes
thank you—
always use
Resinol

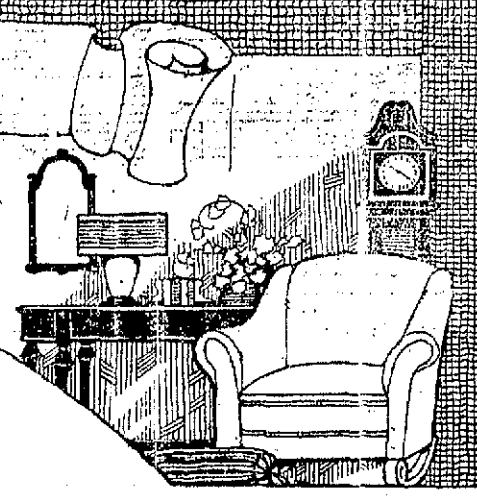

"I never fail to look for the blue box with the oval jar inside, and nothing else will do as I am convinced that Resinol Ointment cannot be excelled for eczema, rashes, and similar irritations." This is the attitude of hundreds of people who know that Resinol's gentle medication rarely fails to stop itching and burning at once and restore skin health.

All druggists sell it in two sizes—never in bulk. Restores the itching.

FEBRUARY

FURNITURE Sale

Our Furniture Prices are Guaranteed Against Decline

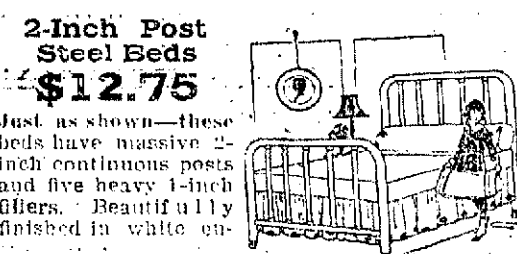

For the benefit of some who may have the wrong impression regarding Furniture prices—we want you to know that during this greatest of February Sales—Aaron prices have reached their lowest level. And if the price of any article of Furniture goes below our February Sale price at any time before next August—we will refund the difference in cash or credit to your account. Thus you are fully protected on your purchases.

Connellsville's Reliable
AARON'S
Housefurnishers Since 1891

So why delay? Why deny yourself the comforts and conveniences of an attractive, cozy furnished home—when you can buy the things you need now at Aaron's—at **GUARANTEED** rock-bottom prices. The large varieties you will find on our Six Big Floors and Basement enable you to choose here exactly what you want. Easy payment terms gladly arranged, if desired.

ALIEN PROPERTY BACK TO OWNERS

Government Will Return It All
Within Five Years.

HALF BILLION IN TREASURY

Uncle Sam is Gradually Closing Shop in His Capacity as Trust Officer for Alien Enemies—Property Estimated at \$114,000,000. Already Has Been Returned to Owners—Some Problems Left Over for the Next Congress to Decide.

Within five years the United States government will have returned to that army of men and women classed as alien enemies every vestige of the German and Austrian property seized during the war by the alien property custodian. Uncle Sam is gradually closing up shop in his capacity as trust officer for alien enemies, a role which he fitted with such precision to detail and exacting thoroughness during the war period.

While it is known that a single fortune of up to \$500,000,000, reposes in the coffers of the United States treasury to the credit of alleged enemies of the United States, Francis P. Garvan, alien property custodian, announced that about 10 per cent of the property confiscated has been returned to the owners directly upon the authorization of congress. More than 47,000 trusts are being handled by his office at the present time and these trusts represent property seized which with interest, amounts to a staggering total. In the work of his office Mr. Garvan has directed the return to the former owners of property estimated at \$114,000,000. In many cases the identical property itself was returned, but in many other instances, where such a course would be manifestly impossible, the proceeds from the sale of the particular property in question have been turned over to those lawfully entitled to receive the funds.

New Congress to Decide.

Just how far Mr. Garvan can proceed in the matter of restoring these claims for funds and property must be regulated by the incoming Republican congress. The amazing work performed by Mr. Garvan, and Mr. Palmer before him, will never become public knowledge because the officials who direct this work are zealous that the records be kept secret from the eyes of the prying observer.

If the funds were all returned as soon as authenticated claims were presented there would be little left for Mr. Garvan to do but to perform the ministerial duties incident to such a task. It would no longer involve his discretionary power to decide a claim, the payment being made upon proof of its just equity and the right of the owners to become possessed of it again. In hundreds of cases, however, his original foreign property owners have died and the government must see to it that their heirs and proper personal representatives are refunded what is due them.

Representative Pope Caldwell of New York is the author of a bill recently introduced in the house which would restore every cent of the confiscated funds without any further delay. It would leave the virtual effect of wiping out the office of the alien property custodian and placing in the hands of a bureau the task of sending out checks in response to claims approved by a competent trust officer familiar with the details of the individual claims for money.

Congress has to date provided that the following classes of persons are eligible to put in claims for confiscated property:

First—Citizens of the United States and the neutral powers. (This class has largely resulted from changes made in the status of citizenship since the war.)

Second—To German and Austrian subjects who were interned in the United States, provided they still are residents of the United States.

Third—To American born women who married German subjects prior to April 6, 1917. In the event, however, that their property was not received from a source which had German or Austrian interest.

Two Bills Prepared.

Two bills are now being considered by the house committee on interstate and foreign commerce which have for their object the strengthening of rights of women who have made alliances with German subjects.

The latest report which Mr. Garvan made to his governmental superiors is enlightening in many respects, in that it serves to show in a concrete way what has been accomplished. "About 10,000 of these cases," the report, referring to the trusts which the office has created, "are being covered by reports in which the administration has not yet reached the stage of valuation. When the entire number of trusts reported shall have been finally opened on the books and the readjustment of values consequent upon appraisal shall have been completed, it is estimated that the total value of the alien property custodian will reach the sum of \$700,000,000."

"The total amount of government funds expended by the office of the alien property custodian, from the time of its organization to February 15, 1920, is about \$1,000,000. Thus it will be seen that the cost to the government of administering nearly 33,000 trust estates of a total value of \$700,000,000 located in every state in the Union, and in every insular possession, is only about 1.7 per cent of the principal of the trust estates for a period of nearly two years. Records of enormous administration which has never been approached by any trust company in the world."

Not only did the alien property custodian do his part in rendering assistance to the millions of enemy property in this country, but in an aggressive fashion the office was a great help to the allies. The report which the alien property custodian has sub-

OUR FEBRUARY FURNITURE SALE

Our Entire Stock

25 to 50% Off

As Manufacturers Have Reduced Prices to Us So We Have Dropped Our Prices to You

Rapport-Featherman Company COMPLETE HOME FURNISHERS Opposite McCrory 5 & 10c Store

congressional hearings designed to get at the facts with reference to the large number of aliens looked after by the department of justice. Some of these cases were strikingly described. About the most prominent of these cases was the misfortune of Mrs. Willie (Lillian) Hilpprecht, born in the United States of American parents and having an ancestry that had been American in thought and deed for two generations. She was married in 1903 to Fred Hilpprecht, a German subject, and he had never taken out naturalization papers. Prof. Hilpprecht came to Philadelphia in 1880 from Germany, and in the same year became professor at the University of Pennsylvania. He was curator of the Babylonian section of the university museum and professor of Assyriology until 1910. Professor Hilpprecht had two sons by a previous marriage. One died and the other is a resident of the United States and has several children. In 1913 Professor Hilpprecht and his wife were in Munich when the war broke out. As a result, and his wife, under American laws, having the same citizenship as her husband, could not leave Germany.

she was formally adjudged a German subject and they remained in Germany during the war. When the United States entered the war against Germany, Hilpprecht fled to Holland. There she was to Sweden where she lived since Hilpprecht fled. Hilpprecht suffered from physical infirmities and has not been able to secure a passport to the United States. Her property here was valued at half a million dollars. The alien property custodian then Mr. Palmer seized it and it is still being held on the ground that she is a German subject and hence forbidden by the trading with the enemy act from holding title to that property. Although Mrs. Hilpprecht was left a large income under a trust created for her sole and separate use by her father, she could not enjoy the proceeds of the trust, and the funds are accumulating in the alien property custodian's hands. Mrs. Hilpprecht is penniless in Switzerland and is dependent upon the generosity and kindness of her friends.

BIG YEAR FOR MOTORCARS
Factories Turned Out 1,900,000 Cars and 340,000 Trucks During 1920
A total of 1,900,000 passenger cars and 340,000 trucks were produced in motor vehicle factories in the United States during 1920, setting a new record for the automobile industry. The domestic automobile industry, which had produced 1,400,000 motor vehicles while the remainder of the output of 500,000 was imported from abroad, in export orders. The wholesale value of passenger cars produced during the year is estimated at \$1,500,000,000. It is estimated that 1,000,000 cars in storage.

REGION ONE WEEK AND 1,460 MORE IDLE OVENS NEARER END

On the Downward Journey But
Without Sign That It
Has Been Reached.

MERCHANTS FAR BEHIND

Furnace Operators, Having but 25
Plants and 21 Per Cent of Ovens
Running Compared With 16 Plants
and 55 Per Cent Ovens by Former.

From The Weekly Courier:

The coke region is one week in
point of time and 1,460 more ovens, in
point of active production facilities
nearer the extreme low point of the
present depression but still without
dependable signs that the downward
journey has reached its end.

To apply the statement with more
precision to the conditions by which
the merchant and furnace interests
are respectively confronted, it is to be
noted that while furnace production
in the aggregate gained 2,000 tons dur-
ing the week, 484 ovens of these inter-
ests were declared out of blast. It be-
ing still more significant of the situa-
tion that 467 of these ovens were at
independent furnace coaling plants.
While a number of changes were made
at plants of the H. C. Frick Coke com-
pany by blowing out ovens here and
there and blowing in others elsewhere,
the net decrease at the major inter-
ests operations was but 42 ovens.

On the other hand 976 ovens were
classified as out of blast at the mer-
chant plants, or almost exactly twice as
many at all furnace oven plants. In
view of the changes thus made the sit-
uation with special reference to the
merchant producers, is rather strik-
ingly presented by the statement that
out of 84 plants operated by them in
the two districts—22 in the Connells-
ville and 62 in the Lower Connells-
ville district—but 25, or a trifle over 20 per
cent, remain in operation. And it is
proper to add the qualification that a
number of these plants are virtually
banked, or at least so nearly non-
active that they should not be classified
as in actual production. Further, it
should be borne in mind that some of
them are making only one, two, three
or four days, and none more than five,
per week with emphasis on the
only. The W. J. Rainey, Inc., is con-
spicuous among the merchant opera-
tors in the existing depression, as it
has been before, by keeping its opera-
tion almost entirely uninterrupted.

By way of contrast 46, or practically
50 per cent, of the 67 furnace opera-
tors in the two districts are active,
averaging five days or better, each
week.

Figures of the ovens in blast rep-
resent somewhat more accurately the
relative activity than does the num-
ber of plants in production. Thus the
furnace interests, with a total of 23,466
available ovens, have 12,257, or about
52 per cent, in the running. The
merchant operators with an equipment
of 13,222 ovens have 3,281, or about 24
per cent, listed as active, but, as pre-
viously pointed out, many of these are
but nominally in service.

From the foregoing it will be ob-
served that the merchant producers
have made the deepest plunge into the
murky Slough of Despond but
without having touched bottom, at
least not to the extent of being assured
that they have a firm footing from
which to start on the ascent. They
cannot, however, be said to have be-
come disheartened having been pre-
pared for just such a contingency as
has happened, but it is betraying no
confidence to state that the hope is
becoming rather generally indulged
in the trade that the worst may soon
come, if it is not already here, but of
which some doubts persist.

The estimated production of coke
during the week ended Saturday,
February 5, was 167,650 tons, credit-
ed to the two districts as follows:
Connellsville, 125,320, a gain of 230
tons; Lower Connells-ville, 42,330,
a loss of 9,840 tons, or a net loss of
9,610 tons, as compared with a loss of
3,30 tons during the preceding week.
By interests the production was
Furnace, 127,180, a decrease of 2,220
tons; merchant, 19,980, a decrease of
7,530 tons as compared with decreases
of 2,580 and 350 tons during the week
ending January 29.

The additions to the idle oven list
numbered 1,460, of which 484 were at
furnace and 976 at merchant plants.
The ovens blown out or banked in-
cluded the following: Bitter, 50
Davidson, 31, Leith, 22, Debo, 218,
Griffin No. 2, 100, Hensert, 180, Hurst-
ed, 95, Lafayette 76, Puritan, 143,
Sawright, 60, Tower Hill, 408, Geneva,
10, Orient, 240, Thompson No. 1,
101. A few ovens were added at sev-
eral plants of both furnace and mer-
chant interests, the net change hav-
ing been an increase of 1,180 in the
number classified as idle.

COKE TRADE SUMMARY

Another week's progress in
warding off the coke depres-
sion—which in the fullness of
time must come—has been mark-
ed by further and quite pro-
found reduction in the number
of ovens in production. This
change differs from those im-
mediately preceding it in that
484 ovens at furnace plants of
which 47 were at independent
operations were included in the
list of shut-out ovens. The num-
ber of shut-out ovens at mer-
chant plants at the same time
increased to 976. The number
of ovens in production at mer-
chant plants outside of the H. C. Frick
Coke company hence a view to
show that the independent pro-
ducers with merchant aid fur-
nace continue to bear the bur-
den of the decline in demand for
coke. The reduction of 484 ovens
to 1,460 tons—140 tons
of the 1,320 tons being in mer-
chant production.

COMB SAGE TEA IN FADED OR GRAY HAIR

It Mixed With Sulphur It Darkens so
Naturally Nobody Can
Tell.

Grandmother kept her hair beauti-
fully darkened glossy and attractive
with a brew of Sage Tea and Sulphur.
Whenever her hair took on that dull
faded or streaked appearance this
simple mixture was applied with won-
derful effect. By asking at any drug
store for "Wyeth's Sage and Sulphur
Compound" you will get a large bot-
tle of this old-time recipe improved
by the addition of other ingredients
all ready to use at very little cost.
This simple mixture can be depended
upon to restore natural color and
beauty to the hair.

A well-known downtown druggist
says everybody uses Wyeth's Sage and
Sulphur Compound now because it
darkens so naturally and evenly that
nobody can tell it has been applied.
It is so easy to use too. You simply
dampen a comb or soft brush and
draw it through your hair taking one
strand at a time. By morning the gray
hair disappears. After another appli-
cation or two, it is restored to its nat-
ural color and looks glossy, soft and
beautiful.—Adv.

DR. HARRIGAN'S ADVICE TO KEEPE EXHAUSTED PEOPLE

It's worth your while to read what
a New York specialist has to say about
the nerve and brain cell builder that
the Connells-ville Drug Co. sells as
much of these days. He writes:
"Most of those who are weak, thin, ner-
vous, anemic or run-down have natu-
rally exhausted substances such as
Bitter Phosphate and you will soon see
some astonishing results in the in-
crease of nerve energy and a length of
body and mind."
Bitter Phosphate is a pure organic
phosphate such as good physicians
prescribe to create abundant nerve
force.—Adv.

Mill Run.

ENGINEER ON BESSEMER R. R. MAKES STATEMENT

Bill Says Since Taking Tanlac His
Feels as Well as He Did When He
Got First Run 25 Years Ago.

One of the most noteworthy features in connection with the introduction and sale of Tanlac throughout America has been the large number of railroad men who have been benefited by its use.

One of the latest to testify is Moses Bell, 1208 French street, Erie, Pa., for 25 years an engineer on the Bessemer railroad.

"I've picked up in strength and energy so much since I began taking Tanlac that I feel as fit now as I was when I first got my run 25 years ago," said Mr. Bell.

"For seven years I suffered dreadfully from indigestion and had most of the time with a bad stomach. I had cramping pains in my back over my kidneys and could hardly shake off the drowsy, dizzy spells that would creep over me. Nearly always after eating I'd have dreadful cramping in my stomach and I was so nervous I very seldom got refreshing sleep.

"Since taking Tanlac I'm an entirely different man. I've gained strength right along and have lots of energy now and my daily run gives me back the pleasure of my early days as an engineer."

Tanlac is sold in Conneltsville by all leading druggists. -Acy.

At the Theatres

THE SOISSON.

"A THOUSAND TO ONE"—The great Hobart Bosworth play, threaded with a love interest that adds to, rather than detracts from the dramatic strength of its situations, is being shown today and will also be the feature attraction tomorrow. Bosworth is said to excel in this production his past remarkable performance in such screen successes as "Behind the Door" and "Behind the Curtain." The character development is superb, adding further laurels to Bosworth's histrionic crown. The production is as faultless as we have ever seen in an outdoor production, and there are some situations that make us wish to see more of how Hobart Bosworth in dress clothes "putting on the dog."

Ethel Grey Terry plays opposite the star and gives a capable performance as the girl who has been tricked into marriage for the sake of her fortune but who ultimately finds love and happiness in the arms of the star.

THE PARAMOUNT.

"SO LONG, LETTY"—A six-reel comedy produced by the master comedy-drama producer, Al Christie, is an interesting attraction today. The opening of "So Long, Letty" finds two newly married couples—the Robins and the Millers—residing in adjoining bungalows in a select colony just outside of San Francisco. Harry Miller likes the word "speed" in all forms while his wife Gracie is strong for glitzy gowns, home cooking and knitting. Tommy Robbins loves his frill and home-cooked victuals, but Letty, his wife, has a penchant for Paris gowns, ukuleles and jazz in general. It's a sad mixup. Harry and Tommy get together, something must be done. Each decides the temperament of the other's wife would suit him better, so they decide to make a switch via the divorce courts. Gracie and Letty are duly advised of the decision and asked their opinions. They go into secret conference only to return with the ultimatum that they are agreeable on the condition that the swapping scheme be given a week's trial before legal action begins. T. Roy Barnes and Colleen Moore give very delightful performances as Harry and Gracie Miller.

The picture will also be shown tomorrow.

THE ORPHEUM.

"AWAY GOES PRUDENCE"—A Paramount picture, with Billie Burke, the charming actress, in the leading role, is being shown today and will also be the attraction tomorrow. Miss Burke has the part of Prudence Thorne, a society girl, who is infatuated with flying and insists on indulging in her hobby even at the risk of losing the love of her sweetheart, Hewitt Harland. To obtain funds from her father for a new airplane she goes into hiding at the home of the washerwoman and writes a black band letter to her father, pretending she is being held for \$50,000 ransom. Hewitt gets wind of this and plans to teach her a lesson by faking a kidnapping of his own. The crooks he has hired, however, do away with him and take Prudence to their headquarters.

REAL AMOUNT OF PROFIT IN COAL SHORT OF CLAIMS

Large Producers Averaged 71 Cents, Subject to Interest and Taxes.

REAL NET 25 TO 35 CENTS

Increases in Wages to Miners Involved Addition of \$1.70 a Ton or Total of \$855,000,000 to Cost of Production; Freight Increase Two Billions.

WASHINGTON, Feb. 11.—The low average profit of bituminous operators throughout the country as contrasted with the extravagant profit generally attributed to them is effectively shown in a mass of data now before the Senate manufacturers committee which has been investigating the coal industry, says an official statement of the National Coal Association. Exactly where the difference exists between the average price of coal sold at the mines and the prices paid by consumers in the market is something the committee has been trying to ascertain.

The data put in by the National Coal Association, from operators in its membership, embracing an output, roughly, of 100,000,000 tons, covering

the shortage emergency of last year, shows an average margin of profit of 71 cents a ton, out of an average sales price of \$3.17 at the mines. The actual average profit, with interest on bonds and liquidated money and all income and excess profit taxes deducted, was from 25 to 35 cents a ton.

In attempting to account for the difference in the average selling price of soft coal at the mines during last year's shortage and the price paid by the ultimate consumer, the Senate committee has examined a number of operators, wholesalers and others so as to determine at exactly what points the higher charges have been put upon the product. From the operators the committee has had figures showing that a fundamentally vital factor in the increased cost to the consumer has been an advance of from 100 to 150 per cent since 1914 in freight rates on coal hauled from the mines.

With soft coal selling at the mines at an average of \$3.17, the average sales price during the shortage of 1920-21 has been shown that freight charges the country over have run from \$3.00 to approximately \$5.00 a ton, depending upon the distance of haulage. For short hauls freight rates have been somewhat less, but, no matter where the haul, the rates have advanced, on

the average more than double since 1914. Thus soft coal sold at the mines at \$3.17 a ton would cost the wholesaler, with the freight rate added, from \$6.50 a ton upwards. Beyond this there are the charges of hauling by wholesalers and retailers, before the coal is dumped into the bin of the consumer.

Because of the sharp drop in the price of coal at the mines, within the last two months, the product is selling now in many fields at a figure considerably lower than the freight rate charged upon it in the haulage to points of destination. This drop in price has been due to lack of demand for the product.

Besides the freight rate advance is a factor in the increased price of coal to the ultimate consumer. J. D. Morrow, vice-president of the National Coal Association, has informed the Senate committee that advances in miners' wages since 1914 have increased the labor cost of production at least 100 per cent. The advance to the miners, he said, has involved an increase of \$1.70 a ton in the cost of production, including the advance of last August.

On 550,000,000 tons of bituminous output a year, the increase in miners' wages means an advance in yearly production cost of \$945,000,000 over the basis existing before the war. The freight rate increases involve an increase of at least \$2,000,000,000 a year on the same output.

Sacred Wars.

Four sacred wars were waged in Ancient Greece, chiefly for the defense of the temple of Delphi.
